EDUCATION

Degree	Institute	Board / University	CGPA/Percentage	Year
B.Tech Engg.	Savitribai Phule Pune University , Pune	SPPU	%	2023-2027
Senior Secondary	Army Public School, Kamptee	CBSE	%	2022
Matriculation	Army Public School, Kamptee	CBSE	%	2020

EXPERIENCE

• TATA TECHNOLOGIES

Jan 2025 - Present

Internship

Hybrid

- Utilized CATIA to redesign and enhance existing AC vent systems, focusing on improving airflow efficiency and reducing energy consumption for a better user experience.
- Leveraged A2MAC1 for comprehensive benchmarking against competitor products, identifying key design trends and performance gaps to inform design improvements and align with market standards
- Coordinated with engineering and manufacturing teams to ensure that design modifications were not only functionally effective but also manufacturable, with an emphasis on cost-efficiency and production feasibility.

PROJECTS

– Twitter Sentiment Analysis for Brand Monitoring

Apr 2023 - Sep 2023

Python, Excel, Tweepy, NLTK, Jupyter Notebooks, TextBlob

- * Built a real-time sentiment analysis tool using Tweepy to fetch over 15,000 tweets related to a brand/product and analyze public opinion.
- * Applied TextBlob and NLTK to classify tweets as positive, negative, or neutral, achieving 88.34% accuracy on a manually validated sample set.
- * Visualized sentiment trends over time using Matplotlib and Seaborn, identifying spikes in negative sentiment during key product announcements.
- * Exported results to an Excel dashboard with dynamic charts to support marketing team decision-making.
- * Documented the full pipeline and deployed the solution in a Jupyter Notebook for stakeholder reviews and reproducibility.

– Cohort Analysis

Jun 2024 - Present

Python, Excel, SQL, Jupyter Notebooks, Matplotlib, Pandas, NumPy

- * Designed and implemented a cohort analysis pipeline using Python and SQL, tracking retention and churn behavior across 10,000+ users segmented by signup month.
- * Used Pandas and SQL joins to group users into time-based cohorts and compute retention metrics over a 6-month period.
- * Visualized user engagement trends using Seaborn heatmaps and line graphs, highlighting a 25% drop-off in week 2 and identifying opportunities for feature improvement.
- * Automated the cohort segmentation and retention calculation process, reducing manual analysis time by 60%.

TECHNICAL SKILLS

- **Programming Languages:** C / C++, Python, SQL
- **Tools and Frameworks:** Jupyter, Excel, Visual Studio, & Figma , Git/Github
- **Other Skills:** Data Interpretation, Report Creation, Documentation
- **Languages I can Speak:** Hindi, English , Marathi

CERTIFICATIONS

- Microsoft SQL Server Database Design Udemy
- Introduction to SQL Programming Udemy
- Excel Tips and Tricks Udemy
- SQL for Data Analytics and Business Analytics Udemy

POSITIONS OF RESPONSIBILITY

- Representative,
